

Hubble

An IMAX® Experience

Rated: G
Running Time: 45 min.

2D & 3D

Opening on April 17

**Limited 2 Week
Engagement**

Experience the gripping story — full of hope, crushing disappointment, dazzling ingenuity, bravery, and triumph. HUBBLE is the seventh awe-inspiring film from the award-winning IMAX Space Team.

Narrated by Leonardo DiCaprio and vividly captured with IMAX technology, HUBBLE recounts the amazing journey of the most important scientific instrument since Galileo's original telescope and the greatest success in space since the Moon Landing — the Hubble Space Telescope. Audiences will accompany the space walking astronauts as they attempt some of the most difficult tasks ever undertaken in NASA's history, and will experience up close the awesome power of the launches, the heartbreaking setbacks, and the dramatic rescues of this most powerful story.

HUBBLE will also reveal the cosmos as never before, allowing viewers of all ages to explore the grandeur of the nebulae and galaxies, the birth and death of stars, and some of the greatest mysteries of our celestial surroundings, all in amazing IMAX.

Limited 2 week engagement to commemorate the 25th Anniversary of the Hubble Space Telescope in orbit.
